**PLAYLISTING**

# What We Do:

When pitching songs for playlisting, we reach out to our large database of curators with personalized pitches. We try to target as specifically as possible while still aiming wide enough to ensure anything that we're working gets solid and helpful adds. After our initial pitch, we follow up on a weekly basis until the campaign is over (or they place or pass on it). The goal is to get you in as many good fits as possible to increase your monthly listeners and ideally trigger the Spotify algorithm to add you in personalized playlists.
